Summary:

Graduating Senior in the Computer Science Department at NC State University and part-time IT Consultant at Jilasoan, with academic and professional experience in software engineering, web development, interface design, and scripting languages. Creative, professional, and efficient, with practiced time-management skills gained from working during college

Education:

Bachelor of Science, Computer Science - NC State University, Raleigh, North Carolina. Degree expected May 2017. GPA 3.4

Experience:

IT Consultant, Jilasoan, Raleigh, NC, Fall 2015 – Present

- Helped clients with IT solutions including setting up servers, virtualization software, websites, networks, and server backups
- Learned communication skills by interacting directly with employees of other companies to provide IT support and solutions

Software Development Intern, Ipreo, Raleigh, NC, Summer 2016

- Contributed to the continuous development of one of Ipreo's web-based software products, debtdomain (www.debtdomain.com)
- Learned how to write MVC and single-page web-applications using HTML, JavaScript, CSS, AngularJS, and Bootstrap

Software Engineering Intern, TWR Asia, Singapore, Summer 2015

- Programmed a web-based application in Perl that would collect and display data from the ktwr.net website
- Developed intercultural communication skills by working in Singapore and with teams from various other countries

Independent Projects

- Wrote npm package to improve knowledge of Node, Javascript, & npm, Jul. 2016 (www.npmjs.com/package/command-line-arguments)
- Participated in undergraduate research and created a code analysis tool, Nov. 2014 (www.github.com/benjaminlykins/code-coverage)

Skills:

- Four years of Java programming experience
- Practical knowledge of HTML, CSS, JavaScript, Bootstrap, AngularJS, and Perl
- Wrote projects in Python using complex data structures
- Knowledgeable on version control and package management software
